We think it's really important for everybody to help keep our beaches clean. Every year we have a beach clean in Thorpeness and are really proud of everybody that takes part. They pick up all sorts of rubbish from the beach. We should all try to recycle our rubbish in the right places and not throw it on the ground.

Name 5 plastic things found on the beach

1.
2.
3.
4.
5.

Now and then you might find a seal on Thorpeness beach

We are very sorry that you didn't get a straw with your drink. This year we have decided to cut the amount of plastic waste we produce at The Dolphin. We made a pledge to help keep our beaches clean by not serving straws in any of our drinks.

grow**

What kind of flowers
grow on your face?

Tulips

At The Dolphin we think it's really important to look after nature. We have lots of bird feeders in our garden so the birds don't go hungry. Our roof garden is also full of lots of bugs and insects. All of our pretty flowers attract the bees to help them make their honey for us to eat.
